Interim Management Report of Fund Performance

For the Period Ended June 30, 2024

This Interim Management Report of Fund Performance contains financial highlights but does not contain either interim or annual financial statements of the investment fund. You may obtain a copy of the interim or annual financial statements at no cost, by calling 1-844-395-0747, by writing us at Suite 600, 517 – 10th Avenue SW, Calgary, Alberta T2R 0A8, or by visiting our website at www.mawer.com or SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of the above noted methods to request a copy of the investment fund's proxy voting policies and procedures, annual financial reports, proxy voting disclosure record, or quarterly portfolio disclosure.

This Interim Management Report of Fund Performance includes certain statements that are "forward looking information" or "forward looking statements" (collectively, "forward looking information") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, included in this report that address activities, events or developments that the portfolio advisor, Mawer Investment Management Ltd., expects or anticipates will or may occur in the future, including such things as anticipated financial performance, beliefs, plans, goals, objectives, assumptions, information and statements about possible future events, conditions, results of operations, are forward looking information. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective", "will" and similar expressions are intended to identify forward looking information. Undue reliance should not be placed on forward looking information. Forward looking information is subject to various risks described in the Simplified Prospectus, uncertainties, and assumptions about the Fund, capital markets and economic factors, which could cause actual results to vary and in some instances to differ materially from those anticipated by the portfolio advisor and expressed in this report. Material risk factors include, but are not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events. The foregoing list of risk factors is not exhaustive.

All opinions contained in forward looking information are subject to change without notice and are provided in good faith and are based on the estimates and opinions of the portfolio advisor at the time the information is presented. The portfolio advisor has no specific intention of updating any forward looking information whether as a result of new information, future events or otherwise, except as required by securities legislation. Certain information about specific holdings in the Fund, including any opinion, is based upon various sources believed to be reliable, but cannot be guaranteed to be current, accurate or complete and is subject to change without notice.

Management Discussion of Fund Performance

Investment Objectives and Strategies

The objective of the Mawer New Canada Fund (the "Fund") is to invest for above average long-term returns in securities of smaller Canadian companies. This is done by choosing companies that we believe will be wealth-creating in the long-term and are trading at a discount to their intrinsic value. We prefer companies with enduring competitive advantages that will allow them to earn a return greater than their cost of capital over the long-term. The Fund has a long-term buy-and-hold strategy and seeks to keep turnover low.

Risk

This Fund is suitable for investors seeking long-term above-average growth who can tolerate significant volatility. Although the Manager does take measures to mitigate and manage risk, this Fund should be considered a medium-to-high risk fund due to its focus on a higher-risk asset class. General risks of investing in the Fund remain as discussed in the Prospectus. The major risks for the Fund are stock market risk, specific issuer risk, and liquidity risk.

The Manager attempts to reduce the exposure to these risks by not concentrating more than 20% of the net assets of the Fund in a particular Industry as defined by the Global Industry Classification Standards (GICS).

Results of Operations

The Fund's net assets increased 0.1% to \$1,428.4 million from \$1,427.2 million at June 30, 2024. Of this change, \$90.8 million is attributable to positive investment performance and -\$89.6 million was due to net redemptions to the Fund.

The Manager assesses the Fund's underlying securities for liquidity on a quarterly basis. During the period the Fund has remained in compliance with National Instrument 81-102 and has maintained an illiquid concentration of less than 10% of the Fund's Net Asset Value. During the period there were no notable redemptions to the Fund that affected its liquidity.

Over the six-month period, the Fund's Series A units' return was 5.8% (after deducting fees and expenses paid by the series) in comparison to the S&P/TSX Small Cap Index return of 8.8%. All performance values provided are in Canadian dollar terms.

Sector allocation was negative, partially offset by the positive security selection. Security selection was particularly positive in Financials and Technology. At the stock level, TerraVest Industries, a tank manufacturing company, performed well with strong earnings and a larger following by capital market participants. Our holding in Trisura Group, a specialty insurer, benefited as the fundamentals of the business are strong and market worries around a write-down on a reinsurance recoverable last year faded.

There were also holdings that lagged in the period. Wajax, a heavy equipment dealer and service center, declined on slower heavy equipment sales in construction and forestry. The business's recurring revenues remained resilient, and we believe the overall outlook remains positive. Jamieson Wellness, a manufacturer of vitamins, minerals and supplements, faced headwinds from inventory changes by retailers and their continued investment in growth has pressured margins.

We initiated a position in Vitalhub, a healthcare software company focused on hospitals and health authorities, by participating in an equity offering. The company is led by a highly aligned management team with a positive track record of consolidating software companies through disciplined capital allocation and integration with its technology hub in Sri Lanka. Meanwhile, we exited MTY Food Group, a franchisor of restaurants in North America. The company faces headwinds with worries around the deteriorating strength of the consumer and increased risks as they are replacing their ERP system. We also exited our position in Savaria, a company that focuses on residential mobility such as residential elevators and stair lifts, due to our view that the company's relative return potential has shifted as management faces operational headwinds and our assessment of valuation.

During the recent period, several equity markets reached highs driven by a few technology focused companies that have benefited from investor excitement for artificial intelligence-related advancements. Despite this, the overall outlook remains less upbeat, as other areas of the market have not been as robust.

Consumer weakness has been a growing concern as the eroding of purchasing power from high inflation has the potential to impact discretionary spending. Geopolitics also plays a role in shaping the economic environment and there are many key elections in 2024 that may lead to political shifts. The general shift away from a globalized world to protectionism may also have highly uncertain impacts on many businesses with international operations. Conversely, growth has generally remained positive, although has moderated in some regions, and central banks have the ability to ease monetary policy to spur economic activity if required.

In light of the outlook, we continue to play the plan, focusing on what we can control and following our investment process.

Recent Developments

There are no recent developments to report related to the strategic positioning of the Fund, the Manager, or the policies of the Independent Review Committee.

Related Party Transactions – Management Fees

The Portfolio Advisor receives management fees, which are calculated for Series A Units as 1.20% per annum of the net asset value of the Fund calculated on a daily basis. Management fees for Series O and Series S units are payable directly to the Manager by investors and dealers respectively and not by the Fund.

The Manager of the Fund has the ability, at their discretion, to reduce the management fees for large investors. This reduction is effected by means of a management fee distribution and will be automatically reinvested in additional units of the Fund at the net asset value of the Fund on the date of distribution. Mawer also receives fees for performing administrative services. As at June 30, 2024 the Fund owes Mawer \$0 related to these administrative services.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ended June 30, and for each of the past five years ended December 31 as applicable. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements which are prepared in accordance with IFRS.

(1) This information is for the period ended June 30, 2024 and December 31 of any other period(s) shown.

(2) Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net assets during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Advisors manage its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

Sales commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Mutual funds are not guaranteed. Their value changes frequently and past performance may not be repeated.

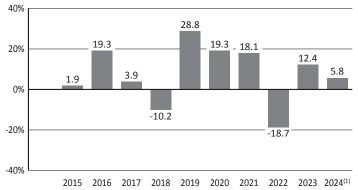

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

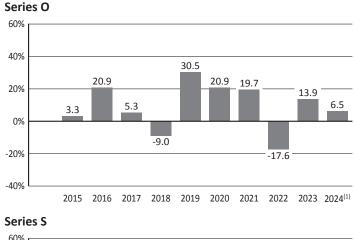

The past performance of the Fund is set out in the following charts.

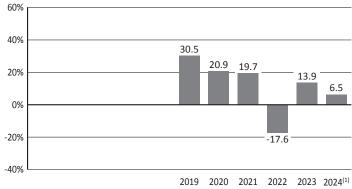

Year-by-Year Returns

The bar charts below show the Fund's annual performance in each of the past 10 years, if applicable, to December 31. The charts show in percentage terms how an investment made on January 1 would have increased or decreased by December 31 of the fiscal year.

(1) This information is for the period ended June 30, 2024 and December 31 of any other period(s) shown.

(*) Series A start date was January 15, 1988; Series O start date was November 28, 2003; Series S start date was June 28, 2018.

Annual Compound Returns

The following table shows the historical annual compound total return of the Fund for the periods shown ending on June 30, 2024. The annual compound total return is benchmarked to the Mawer New Canada Benchmark (NC Benchmark) and calculated on the same compound basis. The NC Benchmark is a composite return stream consisting of the BMO Small Cap Index (Blended, Weighted) from inception to September 30, 2016 and the S&P/TSX Small Cap Index, as of September 30, 2016. The S&P/TSX Small Cap Index is float adjusted and market cap weighted and was developed with industry input as the ideal benchmark for those with small cap exposure of the Canadian equity market. All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.

	1 Year	3 Year	5 Year	10 Year	Since Inception ^(*)
