

### Annual Management Report of Fund Performance

For the Year Ended December 31, 2023

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements at no cost by calling 1-844-395-0747, by writing us at Suite 600, 517 – 10th Avenue SW, Calgary, Alberta T2R 0A8, or by visiting our website at [www.mawer.com](http://www.mawer.com) or SEDAR at [www.sedarplus.com](http://www.sedarplus.com).

Unitholders may also contact us using one of the above noted methods to request a copy of the investment fund's proxy voting policies and procedures, interim financial reports, proxy voting disclosure record, or quarterly portfolio disclosure.

This Annual Management Report of Fund Performance includes certain statements that are "forward looking information" or "forward looking statements" (collectively, "forward looking information") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, included in this report that address activities, events or developments that the portfolio advisor, Mawer Investment Management Ltd., expects or anticipates will or may occur in the future, including such things as anticipated financial performance, beliefs, plans, goals, objectives, assumptions, information and statements about possible future events, conditions, results of operations, are forward looking information. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective", "will" and similar expressions are intended to identify forward looking information. Undue reliance should not be placed on forward looking information. Forward looking information is subject to various risks described in the Simplified Prospectus, uncertainties, and assumptions about the Fund, capital markets and economic factors, which could cause actual results to vary and in some instances to differ materially from those anticipated by the portfolio advisor and expressed in this report. Material risk factors include, but are not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events. The foregoing list of risk factors is not exhaustive.

All opinions contained in forward looking information are subject to change without notice and are provided in good faith and are based on the estimates and opinions of the portfolio advisor at the time the information is presented. The portfolio advisor has no specific intention of updating any forward looking information whether as a result of new information, future events or otherwise, except as required by securities legislation. Certain information about specific holdings in the Fund, including any opinion, is based upon various sources believed to be reliable, but cannot be guaranteed to be current, accurate or complete and is subject to change without notice.

### Management Discussion of Fund Performance

#### Investment Objectives and Strategies

The objective of the Mawer EAFE Large Cap Fund (the "Fund") is to achieve above-average long-term risk-adjusted returns and to create a diversified portfolio of equity and equity related securities of larger companies located in developed countries outside of Canada and the United States, primarily in Europe, Australasia and the Far East (EAFE). This is done by choosing companies that we believe will be wealth-creating in the long term and are trading at a discount to their intrinsic value. We prefer companies with enduring competitive advantages that will allow them to earn a return greater than their cost of capital over the long term. The Fund has a long-term buy and hold strategy and seeks to keep turnover low.

#### Risk

This Fund is suitable for investors seeking long-term growth and who have a medium tolerance for risk. General risks of investing in this Fund are outlined in the Prospectus and include the possibility of reduction in value of any given investment, liquidity risk, interest rate risk and currency risk amongst others.

The Manager attempts to reduce the exposure to these risks by not concentrating more than 20% of the net assets of the Fund in a particular Industry as defined by the Global Industry Classification Standards (GICS). The Manager provides diversification of risk by investing primarily in equity and equity related securities of larger companies located in developed countries outside of Canada and the United States, primarily in Europe, Australasia and the Far East (EAFE).

#### Results of Operations

The Fund's net assets increased 27.9% to \$81.6 million from \$63.8 million at December 31, 2023. Of this change, \$12.1 million is attributable to positive investment performance and \$5.7 million was due to net contributions to the Fund.

The Manager assesses the Fund's underlying securities for liquidity on a quarterly basis. During the period the Fund has remained in compliance with National Instrument 81-102.

Over the twelve-month period, the Fund's series A units' return was 17.4% (after deducting fees and expenses paid by the series) in comparison to the MSCI EAFE Index (Net) return of 15.1%. All performance values provided are in Canadian dollar terms.

2023 went out with a bang as the MSCI EAFE Index posted a stellar return in the fourth quarter and posted strong gains for the year. Markets surged as investor sentiment shifted dramatically towards the view that central banks are not only done with interest rate hikes this cycle but are also on the verge of meaningful easing starting in 2024.

## Mawer EAFE Large Cap Fund

In terms of relative performance, positive security selection, particularly in Technology and Industrials, was the main driver of outperformance. Sector allocation was also positive over the period. Reflecting the broad nature of the market's advance, most portfolio holdings delivered positive returns. Two Japanese companies were stand-outs. Disco and Tokyo Electron, both of which provide equipment used in the production of semiconductors, capped off outstanding years that defied what had been expectations for a cyclical downturn. We continue to gather evidence supportive of our fundamental investment theses: notably the mission-critical nature of their equipment, the high barriers to entry given the incredible complexity of their technology, and well-aligned management teams. Strong fundamentals and organic growth also boosted the performance of reference data providers Wolters Kluwer, RELX and the health care company Novo Nordisk. Meanwhile, Anglo American miner saw its share price fall due to weakness in the commodity prices.

Some of the prominent initiations included Chugai, a pharmaceutical company, with strong internal R&D capabilities and is majority-owned by Roche, and SG Holdings, the second-largest Japanese delivery and logistics company, and can be thought of as the FedEx of Japan. We also reinitiated in brewer Heineken Holding, a company we exited in early 2022 given major input cost headwinds. Those headwinds are set to become tailwinds with the stock trading at what seems to be an attractive valuation. Meanwhile, we exited Recordati, a niche Italian pharma company, in favour of better risk-adjusted opportunities elsewhere.

Now, a very simple model is that equity markets are driven in the short-term by four factors: earnings, rates, events, and investor sentiment. Looking ahead to 2024, we know that war, regulatory actions, geopolitics, and new technologies have the potential to move markets. Investors seem hyper-focused on how central banks will manage rates and whether economic demand will remain as resilient as it has so far. Seven of the world's ten most populous countries are headed to the polls in 2024. And to borrow from Benjamin Graham, Mr. Market's notoriously fickle sentiment can change quickly.

Thankfully, our investment process doesn't rely on such broad-based macro assessments. Its focus is much longer-term and more bottom-up in nature. More precisely: identifying companies that can create wealth by generating returns on capital in excess of their cost of capital for many years by virtue of sustainable competitive advantages. When led by excellent management teams, the wealth-creating nature of these business models can be enhanced and extended. By focusing on companies whose goods and services provide genuine value to their customers, the risk (though can never eliminate) is reduced that events or shocks fatally impair their business models.

### Recent Developments

There are no recent developments to report related to the strategic positioning of the Fund, the Manager, or the policies of the Independent Review Committee.

### Related Party Transactions – Management Fees

The Portfolio Advisor receives management fees, which are calculated for Series A Units as 1.10% per annum of the net asset value of the Fund calculated on a daily basis. Management fees for Series O Units are payable directly to the Manager by Series O investors and not by the Fund.

The Manager of the Fund has the ability, at their discretion, to reduce the management fees for large investors. This reduction is effected by means of a management fee distribution and will be automatically reinvested in additional units of the Fund at the net asset value of the Fund on the date of distribution. Mawer also receives fees for performing administrative services. As at December 31, 2023 the Fund owes Mawer \$0 related to these administrative services.

### Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance since inception. The fund was launched on May 15, 2020 and opened to investors on May 29, 2020. This information is derived from the Fund's audited financial statements which are prepared in accordance with IFRS.

<b>Net asset value per unit<sup>1</sup></b>	<b>12.78</b>	<b>10.95</b>	<b>13.23</b>	<b>11.51</b>

<sup>(1)</sup> This information is provided as at December 31 of the year shown, as applicable.

<sup>(2)</sup> Management expense ratio is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net assets during the year. The Manager, at its discretion, absorbed certain expenses otherwise payable by each Series. The Manager may change the amount absorbed or discontinue absorbing these expenses at any time without notice.

<sup>(3)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

<sup>(4)</sup> The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Advisors manage its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

### Past Performance

Sales commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Mutual funds are not guaranteed. Their value changes frequently and past performance may not be repeated.

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

The past performance of the Fund is set out in the following charts.

### Year-by-Year Returns

The bar charts below show the Fund's annual performance in each of the past 10 years, if applicable, to December 31. The charts show in percentage terms how an investment made on January 1 would have increased or decreased by December 31 of the fiscal year.
